ABOUT THIS ISSUE

Volume 4, Issue 4 brings together research on financial risk and management information systems, AI-enabled talent development, advertising markets, language learning and translation, circular RNA in cancer, renewable energy, blockchain-enabled supply chains, machine learning in finance, erosion control, electrical protection, accessible generative AI, and cardiac-device outcomes. Across business, education, health, energy, and infrastructure, the studies demonstrate why emerging technologies must be assessed not only for performance but also for transparency, inclusion, safety, institutional accountability, and their wider consequences for society.

ABOUT THE JOURNAL

JKLST is a peer-reviewed, open-access journal publishing original research, reviews, case reports, short communications, and other scholarly contributions across knowledge, learning, science, and technology.
